

RingSID International Dialling.

To save money on your international phone call, simply:

- 1) Find the destination you want to call below and note the price. This price is the pence per minute charge.
- 2) Dial the applicable access number from the table on the right.
- 3) After the prompt you will hear a dial tone, enter the full number (including the country code) of the person you are calling (if you are calling from a mobile, do not press the 'green' receiver button after entering the number).
- 4) A connection should be made within several seconds

You will be billed by your landline provider at the rate stated above at all times (excluding any connection charge). There are no additional charges made by us.

PLEASE NOTE: If you are calling from a mobile or using certain lo-cost networks, a surcharge may be added by them. Please check with them for any additional charges when calling an 0844, 0871, or 090 type number.

Our rates change from time to time (usually in the first week of the month). Please revisit the website to view up-to-date rates.
